
❖ **POLICY-008_Reporting & Consultancy**

2020 Fire Protection Pty Ltd (2020) is contracted by the owners of properties to undertake inspection and testing to AS1851, and where an Annual Fire Safety Statement is applicable - to verify the performance of all essential fire safety measures within their building.

A reasonable expectation is that 2020 Fire Protection will provide an accurate report outlining items that passed, failed, require maintenance or performed contrary to the Standards applicable.

It is also reasonable, due to the complexity of fire protection systems, that 2020 Fire Protection will explain the report to the owners in a meeting.

As properties are becoming more complex and building defects have become far more prevalent; 2020 Fire Protection are commonly being asked to provide additional reporting & consultancy services to assist the owners in assigning responsibility and/or cost.

While we do not include for extra services in our standard maintenance agreement, 2020 Fire Protection can provide them for a fee as outlined at the bottom of this document.

To understand what is/is not included in our standard reporting, please see below:

Reporting occurs following these attendances:

- Monthly Testing.
- Six Monthly Testing.
- Annual Testing.
- Annual Accredited Practitioner - Verification of Performance.
