

**20** **20** FIRE

**CAPABILITY**  
STATEMENT / 2023

# Company Overview

**2020 Fire Protection** is a fire protection and safety company that services pre-existing structures within the Greater Sydney area. We offer a wide range of services to ensure all your safety needs are met.

We offer inspection and testing, equipment repairs and maintenance, annual fire safety statements, council fire order upgrades, installation of fire systems and equipment, and office fit outs.

2020 Fire Protection was founded by our director and CEO, Rob Broadhead, in 2010. He has more than three decades of experience in the fire protection industry.

We serve a variety of industries and agencies, including airports, factories, strata, public buildings, state and private schools, and more.

---

**At 2020 Fire, we are experts in fire safety protection for everything from residential strata to large-scale commercial office buildings.**

## Our Purpose

Here at 2020 Fire Protection, we ensure client satisfaction by doing things right the first time and explaining our work simply and transparently.

---

Our name was created from the idea of having '20/20' vision and we reflect that level of clarity in our values:

- ✓ We care;
- ✓ Quality matters; and
- ✓ We keep people safe.

We think that if you don't care or believe that quality matters, then you will never be able to keep people safe. Because of that, we ensure everything is done to the highest standard and with the highest level of professionalism.

Over the years, we have grown into a large team of passionate fire safety experts who are here to help protect your building, your people, and assist in all fire protection matters.

*Our team of experts will provide professional services and cost-effective solutions for all things fire protection in your building.*

# Our Services

Fire safety is at the heart of everything we do here at 2020 Fire. Our team provides a wide range of services to ensure you and your pre-existing buildings are compliant and as safe as possible when it comes to fire.

We can service any space including, but not limited to, large-scale residential buildings, local and state government entities, office buildings, hotels, aged care, airports, correctional facilities, and schools.

Our team includes FPAS accredited technicians and Accredited Practitioners, meaning you can trust that your building is being cared for by experts.

**Our highly qualified and professional team at 2020 Fire is able to provide a range of protection services that are affordable, understandable, and sustainable.**

## ✓ FIRE SAFETY INSPECTION & TESTING

All good fire protection starts with inspections and testing. We'll look at everything, from smoke detectors and sprinkler systems to fire extinguishers and fire doors. For every job at your site, we will assign the same technicians each time so that they become familiar with the building and reduce headaches for you.

## ✓ FIRE EQUIPMENT REPAIRS & MAINTENANCE

No matter the size of the building, we will ensure all of your fire protection equipment has been maintained and will conduct any repairs needed. Our team will also communicate with simplicity and transparency about any repairs or maintenance required. If you have questions, we have answers.

## ✓ ANNUAL FIRE SAFETY STATEMENTS

Since 2020, not only it is mandatory to produce an Annual Fire Safety Statement (AFSS), and but an Accredited Practitioner (Fire Safety) must now also be engaged to 'sign-off' all essential fire safety measures on your property. Here at 2020 Fire, we have several team members on hand to make the process simple for you.

## ✓ COUNCIL FIRE ORDER UPGRADES

If your building is ever served with a council fire upgrade order, we can offer advice or provide necessary services to ensure your building is compliant with all relevant local, state, and federal fire safety regulations.

## ✓ FIRE SYSTEMS & EQUIPMENT

Our team can install new or update pre-existing fire systems within spaces to ensure your building is compliant with regulations. This can include sprinkler systems, fire hydrants, hose reels, portable extinguishers, smoke alarms, emergency warnings and intercom systems, and exit and emergency lighting.

## ✓ OFFICE FIT OUTS

As you customise your offices to suit the needs of the space, we are able to design a fit out that will provide the fire protection needed and ensure your building is compliant with all building codes and Australian standards.

# Industries We Serve

Fire protection is a necessary component of all buildings, regardless of use or industry. For that reason, we service a wide range of properties across many industries.

From small-scale unit complexes to office high-rises, from schools to factories, 2020 Fire Protection is the team you can trust with all your fire safety needs.

 Commercial Buildings

 Strata

 Industrial Sites

 Hotels

 Airports & Infrastructure

 Schools

 Correctional Facilities

 Local and State Government Facilities

# Accreditation and Expertise

Here at 2020 Fire Protection, our team is expertly trained and we hold several vital accreditations. This means we provide services that are high quality and up to industry standard. We regularly audit our systems and our teams to ensure we maintain our high standards, allowing you to rest easy knowing we will do everything right the first time.

✓ ISO 9001: Quality Management
